# Subject Index—Volume 16

## A

Abdomen, biplanar serial angiography of, cross-hatched wedged grid for, 305 Abdominal Trauma, CT in, 260
Abstracts, from 1981 meeting of Association of University Radiologists, 360–434
Acetylcholine, and CT contrast enhancement of kidney V2 carcinoma, 487
Adult respiratory distress syndrome (ARDS), scintigraphic evaluation, 473
Algorithm, thresholding, for radionuclide angiocardiography, 115
ε-Aminocaproic acid, in inhibition of radiologic contrast media-activated complement, 152
Amipaque, *see* Metrizamide
Angiocardiography, radionuclide, thresholding algorithm for, 115
Angiography
  biplanar serial, of abdomen, 305
  cerebral, plus video dilution technique, for assessment of cerebral blood flow, 181
  new angiographic agents with less fibrillatory propensity, 320
  peripheral, 226
Aortofemoral arteriography, pain and, 508
ARDS, *see* Adult respiratory distress syndrome
Aromatic amines, in diatrizoate contrast agents, 517
Artery, renal, transcatheter obliteration with urogranoic acid-enhanced cyanoacrylate, 65
Arthrography
  knee, 188
  perfluorocarbon compounds in, 46
Association of University Radiologists 1981 meeting, 353–434
Autoradiography, subtractive photographic reducers in, 221
Avitene, transcatheter embolization with, 501

## B

Bile, excretion and flow, RCK-136 and, 513
Biliary obstruction, ultrasonic study, 317
Biodistribution, of particulate hepatolienographic CT contrast agent (iodipamide ethyl ester) in rat, 40
Biplanar serial angiography, abdominal, cross-hatched wedged grid for, 305
*Blepharisma americanum,* in screening for contrast media toxicity, 438
Blood coagulation, ultrasonic features, 71
Blood flow
  carotid, assessment by video dilution technique, 181
  cerebral, assessment by video dilution technique, 181
  peripheral, assessment by video dilution technique, 298
Blood stasis, ultrasonic features, 71
Body cavities, contrast examination, Amipaque in, 455
Bone mineral density, measurement of, coherent/Compton scattering method, 491
Bromoethylaminehydrobromide, in experimental renal papillary necrosis, 107

## C

C1-esterase inhibitor, glucorticoid-induced elevations in, a protective mechanism against lethal dose contrast challenge in rabbits, 20
Carcinoma
  ovarian, staging and follow-up, CT whole body scanner in, 479
  renal, catheter therapy in, 65
    CT contrast enhancement after norepinephrine and acetylcholine injection, 487
Cardiovascular system
  effects of protamine sulfate on, 324
  effects of radiographic contrast media on cultured myocardial cells, 141
  experimental MI in closed-chest dog, 7
  new angiographic agents with less fibrillatory propensity, 320
Carotid blood flow, assessment, video dilution technique, 181
Cat, effects of radiographic contrast agents on spinal cord physiology, 234
Catheter therapy, in renal carcinoma, 65
Chemotaxis, radiographic contrast media and, 133
Chemotherapy, intra-arterial infusion-occlusion, 496
Chest radiography
  lung nodules, densitometric measurement, 201
  photographic unsharp masking in, 281, 529
  of pulmonary artery hypertension in COPD, 95
Cholangiography, IV, iosulamide meglumine as contrast agent for, 240
Chondrosarcoma, extraosseous, 451
Chronic obstructive pulmonary disease (COPD), pulmonary artery hypertension in, 95
Coherent/Compton scattering, for measurement of bone mineral density, 491
Collapsible tubes, fluid mechanics in, 525
Complement activation
  radiologic contrast material and, inhibition with ε-aminocaproic acid, 152
  radiographic contrast media and, 133
Computed tomography (CT)
  abdominal trauma, 260
  contrast-enhanced, biodistribution of iodipamid ethyl ester in the rat, 40
  contrast enhancement of kidney V2 carcinoma after norepinephrine and acetylcholine injection, 487
  dynamic, time-density study of normal human tissue after IV contrast administration, 36
  factors affecting measurement of size and CT number, 337
  in intracranial complications of pediatric hematologic disease, 175
  of lung density during hemorrhagic shock and after resuscitation, 466
  transmission, in identification of oligemic lung, after experimentally produced acute pulmonary arterial occlusion in dog, 275
  use of CT whole body scanner to stage and follow advanced ovarian carcinoma, 479
Computer-assisted metrology, in estimation of number and volume of gallstones visualized by cholecystography, 342
Computer diagnosis
  gallstone number and volume, 342
  renal masses, 77
Computerized gamma scintigraphy, in single isotope evaluation of pulmonary capillary protein leak (ARDS model), 473
Congestive heart failure, experimental, direct cannulation and injection lymphangiography of canine cardiac and pulmonary efferent mediastinal lymphatics in, 193
Contrast materials
  Amipaque in vascular use and use in body cavities, initial clinical studies, 455
  aqueous, harmful effects on GI tract, 50
  biodistribution of particulate hepatolienographic CT contrast agent (iodipamide ethyl ester) in rat, 40
  CT contrast enhancement in kidney V2 carcinoma after norepinephrine and acetylcholine injection, 487
  diatrizoate, metabolism of, 517
  dynamic CT time-density study of normal human tissue after IV contrast administration, 36

effect of radiographic contrast agents on spinal cord physiology, 234
effect of radiographic contrast material on cultured myocardial cells, 141
effect of radiographic contrast media on leukocyte locomotion, 133
glucocorticoid-induced elevations of C1-esterase inhibitor: a mechanism for protection against lethal dose range contrast challenge in rabbits, 20
in vitro activation of complement by radiologic contrast materials, inhibition by ϵ-aminocaproic acid, 152
intracoronary arterial injections, dromotropic effects, in dogs, 443
new angiographic agents with less fibrillatory propensity, 320
noninvasive estimation of kidney function by X-ray fluorescence analysis: biological half-life and clearance of contrast in rabbits, 215
pain and aorticofemoral arteriography, 508
particulate, iodipamide ethyl ester, 40
perfluorocarbons, in arthrography, 46
potential of iosulamide meglumine as contrast material for IV cholangiography, 240
release of serotonin from human platelets in vitro by radiographic contrast media, 245
toxicity screening, in protozoan culture, 438
urogranoic acid as radiopaque additive to cyanoacrylate in transcatheter obliteration of renal arteries, 65
urographic, metabolism of, 159
zwitterionic oral cystopaque, development and pharmacologic evaluation, 513
Coronary arteriography, dromotropic effects of various contrast agents, 443
Cross-hatched wedged grid, for biplanar serial angiography, 305
Currents in imaging, 249, 349
Cyanoacrylate, urogranoic acid-enhanced, in transcatheter obliteration of renal arteries, 65

## D

Densitometry, film, lung nodules, 201
Diatrizoate, metabolism, 517
Digitalized longitudinal tomography, 126
Discovertebral destruction, 89
Dog
biliary obstruction in, sequential study of sonographic threshold, 317
cardiovascular effects of protamine sulfate, 324
CT study of lung during hemorrhagic shock and after resuscitation, 466
direct cannulation and injection lymphangiography of cardiac and pulmonary efferent mediastinal lymphatics in experimental congestive heart failure, 193
dromotropic effects of intracoronary arterial injections of contrast materials, 443
experimental MI in closed-chest dog: a new technique, 7
harmful effects of aqueous contrast agents on GI tract: a study of mechanism and means of counteraction, 50
improved image quality and examination procedures in xeroradiographic peripheral angiography, 226
intestinal ischemia, thermographic prediction of intestinal viability and survival after, 24
potential of iosulamide meglumine as a contrast agent for IV cholangiography, 240
radionuclide measurement of differential GFR, 59
sonographic manifestations of acute renal vein thrombosis, 30
successful identification of oligemic lung by transmission CT after experimentally produced acute pulmonary artery occlusion, 275
transcatheter electrocoagulation of pulmonary artery, 289
transcatheter embolization with Gelfoam and Avitene, effect of Sotradecol on arterial occlusion, 501
transcatheter intra-arterial infusion-occlusion chemotherapy, 496
ultrasonography of blood during stasis and coagulation, 71
urogranoic acid as radiopaque additive to cyanoacrylate adhesive in transcatheter obliteration of renal arteries, 65
Dromotropic effects, of intracoronary arterial injections of contrast material, in dogs, 443

## E

Electrocoagulation, transcatheter, in study of pulmonary thrombosis, 289
Embolization, transcatheter, 501
2-[3(N-Ethyl-2-hydroxyethylamine-acetamido-2, 4, 6-triiodobenzyl] butyric acid (RCK-136), 513
Extraosseous chondrosarcoma, 451

## F

Ferric citrate, effect on tumor and tissue distribution of tracers, 229
Fluid mechanics, and collapsible tubes, 525
Fractures, multiple, in generalized osteoporosis, 171

## G

Gallstones, number and volume estimation, computer-assisted method, 342
Gallium-67, tumor and tissue distribution of, effect of variables on, 120, 229
Gastrointestinal tract
epigastric mass in asymptomatic adult, 256
harmful effects of aqueous contrast agents on, 50
intestinal viability and survival after ischemic injury, thermographic evaluation, 24
thoraco-abdominal mass, 451
Gelfoam, transcatheter embolization with, 501
Glomerular filtration rate (GFR)
differential, radionuclide measurement of, 59
noninvasive estimation, 215
Glucocorticoid-induced elevations of C1-esterase inhibitor: a protective mechanism against lethal dose contrast challenge in rabbits, 20
Grids, for biplanar serial angiography, 305

## H

Hemophilia, intracranial complications, CT findings, 175
Hemorrhagic shock, lung in, CT study, 466
Hepatoma, rat liver, nuclear magnetic resonance imaging, 354
Hypertension, pulmonary artery, in COPD, 95

## I

Information theory model of diagnosis of renal masses, 77
Infusion-occlusion chemotherapy, intra-arterial, 496
Intrauterine growth retardation (IUGR), ultrasonic evaluation, 101
Iodipamide ethyl ester, biodistribution, 40
Iopanoic acid, metabolism, in rats, 330
Iosulamide, as contrast agent for IV cholangiography, 240
Ischemia, intestinal, thermographic prediction of intestinal viability and survial after, 24

## J

Jaundice, obstructive, ultrasonic study, 317
Joint disorders
arthrography using perfluorocarbon compounds, 46
chronic knee pain in 35-year-old man, 1
effusion, diagnosis on lateral and axial projections of knee, 188

## K

Kidney
differential GFR, radionuclide measurement, 59
dynamic CT time-density study of normal human tissue after IV contrast administration, 36
infarction, radionuclide measurement of differential GFR in, 59
mass evaluation, information theory model of diagnosis, 77
noninvasive estimation of function by X-ray fluorescence analysis, 215
pyelorenal backflow in normal and ischemic rabbit kidneys, 206
renal papillary necrosis, in rats, 107
renal vein thrombosis, retrograde pyelography in, pyelovenous and pyelolymphatic backflow during, 13
sonographic manifestations, 30
transcatheter obliteration of renal arteries with urogranoic acid-enhanced cyanoacrylate, 65
V2 carcinoma, CT contrast enhancement of, 487
Knee, *see* Joint disorders

## L

Letter to editor, 529
Leukemia, intracranial complications, CT findings, 175
Leukocyte locomotion, effect of radiographic contrast media on, 133
Liver
biodistribution of particulate CT contrast agent in, 40
hepatoma (in rat), nuclear magnetic resonance imaging in, 354
Lung
density, during hemorrhagic shock and after resuscitation, 466
nodules, densitometer measurements on chest radiographs, 201
oligemic, transmission CT identification of, 275
pneumothorax, estimation of size, 165
pulmonary artery hypertension in COPD, 95
tumor, detection of, 435
Lymphangiography, injection, 193
Lymphatics, cardiac and pulmonary efferent mediastinal, in experimental congestive heart failure, 193

## M

Manganese-54, tumor and tissue distribution of, effect of variables on, 120, 129
Metabolism
3-amino-5-acetamido-2, 4, 6-triiodobenzoate, 517
3, 5-diamino-2, 4, 6-triiodobenzoate, 517
iopanoic acid, 330
of urographic contrast media, 159
Methylglucamine iodipamide (Cholografin), lethal dose challenge in rabbits, protective mechanism against, 20
Metrizamide (Amipaque), in vascular radiology and in examination of body cavities, initial clinical trials, 455
Metrology, computer-assisted, in estimation of volume and number of gallstones, 342
Microangiography, renal papillary necrosis, in rats, 107
Microradiography, renal papillary necrosis, in rats, 107
Myocardial cells, cultured, effect of radiographic contrast media on, 141
Myocardial infarction (MI), experimental, in closed-chest dog, 7

## N

Neurotoxicity, of radiographic contrast agents, 234
Norepinephrine, and CT contrast enhancement of kidney V2 carcinoma, 487
Nuclear magnetic resonance imaging
in medicine, physical principles, 269
rat liver hepatoma, 354

## O

Observer performance ROC analysis, 435
Obstructive jaundice, ultrasonic study, 317
Occlusion-infusion chemotherapy, intra-arterial, 496
Oral cholecystopaque, RCK-136, development and preliminary pharmacologic evaluation, 513
Osteoporosis, generalized, 171
Ovarian carcinoma, CT whole body scanner in, 479

## P

Pain
aorticofemoral arteriography and, 508
chronic, of knee, 1
Perfluorocarbon compounds, in arthrography, 46
Peripheral vascular disease, evaluation of, video dilution technique, 298
Pharmacokinetic model, iopanoic acid metabolism in rats, 330
Photographic unsharp masking technique, in chest radiography, 281, 529
Photon scattering, for determination of bone mineral density, 491
Placenta, volume, ultrasonic evaluation, 101
Platelets, in vitro serotonin release by radiographic contrast media, 245
Pneumothorax, size of, simple method for estimation, 165
Progress in Clinical Radiology, abdominal trauma: role and impact of CT, 260
Protamine sulfate, cardiovascular effects of, 324
Protozoa, in screening for contrast media toxicity, 438
Pulmonary artery
hypertension, in COPD, 95
occlusion, oligemia in, transmission CT identification of, 275
transcatheter electrocoagulation of, in dogs, 289
Pulmonary capillary protein leak, technetium-99m HSA evaluation, 473
Pulmonary thrombosis, animal model for study, 289
Pyelography
intravenous retrograde, in renal vein thrombosis, pyelovenous and pyelolymphatic backflow during, 13
retrograde, pyelorenal backflow during, 206

## R

Rabbit
CT contrast enhancement of kidney V2 carcinoma after norepinephrine and acetylcholine injection, 487
glucocorticoid-induced elevations of C1-esterase inhibitor: protective mechanism against lethal dose contrast challenge, 20
metabolism of urographic contrast media, 159
noninvasive estimation of kidney function, 215
pyelorenal backflow in normal and ischemic kidneys, 206
Radiography, knee, lateral and axial projections, in joint effusion, 188
Radionuclide angiocardiography, thresholding algorithm for, 115
Radionuclides, in measurement of differential GFR, 59
Rat (s)
biodistribution of iodipamide ethyl ester—a particulate hepatolienographic CT contrast agent, 40
experimental renal papillary necrosis in, microangiographic and tubular micropuncture injection studies, 107
hepatoma
tracer distribution in, 120, 229
nuclear magnetic resonance imaging, 354
newborn, effects of radiographic contrast material on cultured myocardial cells, 141
physiologic pharmacokinetic model of iopanoic acid metabolism, 330 RCK-136, 513
Reactive hyperemia, 24
Renal, *see* Kidney
Research, clinical, pretreatment phase, neglect of, 87
Resuscitation, dog lung after, CT study, 466
Roentgenologic CPC
chronic knee pain in 35-year-old man, 1
discovertebral destruction in man with chronic back problems, 89
epigastric mass in asymptomatic adult, 256

generalized osteoporosis with multiple fractures in an adolescent, 171
thoraco-abdominal mass, 451

## S

Salicylates, effect on tumor and tissue distribution of tracers, 120
Serotonin, in vitro release from platelets by radiographic contrast media, 245
Sickle cell anemia, intracranial complications, CT findings, 175
Sign of Westermark, 275
Sodium tetradecyl sulphate, and duration of arterial occlusion in Gelfoam- and Avitene-embolized arteries, 501
Sotradecol, *see* Sodium tetradecyl sulphate
Spinal cord physiology, effects of radiographic contrast media on, 234
Spine, discovertebral destruction, 89
Staging, of ovarian carcinoma, CT whole body scanner in, 479
Subtractive photographic reducers, in autoradiography, 221

## T

Technetium-99m human serum albumin, in evaluation of pulmonary capillary protein leak (ARDS model), 473
Thermography, to predict intestinal viability and survival after ischemic injury, 24
Thoraco-abdominal mass, 451
Thrombosis
  pulmonary, in dogs, 289
  renal vein, 13
    sonographic manifestations, 30
Tomography
  computerized, *see* Computed tomography
  digitalized longitudinal, 126
Toxicity
  of aqueous contrast media on GI tract, 50
  cardiovascular, of protamine sulfate, 324
  contrast media, screening for, in protozoan culture, 438
  neurotoxicity of radiographic contrast agents, 234
Tracers, tumor and tissue distribution of, effect of certain variables on, 120, 229
Transcatheter electrocoagulation of pulmonary artery: an experimental model in dogs for studying pulmonary thrombosis, 289
Transcatheter embolization, with Gelfoam and Avitene, effect of Sotradecol in, 501
Trauma, abdominal, CT in, 260
Tumor (s)
  chondrosarcoma, extraosseous, 451
  hepatoma (in rat), nuclear magnetic resonance imaging, 354
  intra-arterial infusion-occlusion chemotherapy, 496
  lung, detection of, 435
  tracer distribution in, effect of certain variables on, 120, 229

## U

Ultrasound
  B-mode, for evaluation of IUGR, 101
  in biliary obstruction, 317
  obstetric, in evaluation of IUGR, 101
  renal vein thrombosis, 30
  ultrasonography of blood during stasis and coagulation, 71
Urogranoic acid, as radiopaque additive to cyanoacrylate in transcatheter obliteration of renal arteries, 65
Urographic parameters, in computer diagnosis of renal masses, 77
Uterus, total intrauterine volume, ultrasonic evaluation, 101

## V

Vascular surgery, Amipaque in, 455
Vasoactive drugs, effect on tumor and tissue distribution of tracers, 120
Video dilution technique
  for assessment of carotid blood flow, 181
  for assessment of peripheral blood flow, 298

## X

Xeroradiographic peripheral angiography, 226
X-ray fluorescence analysis, kidney function in rabbits, 215

## Z

Zwitterionic oral cystopaque, 513
